

TECHNICAL DATA SHEET

Product: AD-CHAMBERS | EXCLUSIVE SURFACE

Catalog Number: ADC-010-1C

Product Description:

The AD-CHAMBERS | EXCLUSIVE SURFACE are chambers and sample holders designed specifically for light microscopy. These carriers are intended for fragile or larger samples, embodying practicality, and inertness. They are manufactured from high-quality stainless steel and treated with a specialized polishing process to achieve an exclusive surface finish.

Key Features:

- **Exclusive Surface Finish:** The surface of these chambers is not just typical sandblasted; it has been exclusively polished to enhance its resistance and durability. This process also improves the aesthetic quality of the chambers, making them more suitable for display and presentation purposes.
- **Broad Range of Applications:** Specially designed for light microscopy, the AD-CHAMBERS are versatile and adaptable for a range of sample types. They can carry anything from smaller, delicate samples to larger, more robust specimens.
- **High-Quality Material:** Made from high-quality stainless steel, these chambers ensure durability and longevity, offering reliable support for samples.
- **Compatibility with Clearing Chemicals:** AD-CHAMBERS are compatible with a wide range of clearing chemicals, enabling a variety of applications and procedures without risk of corrosion or damage.

Please note, it is essential to use these products within their intended applications to maintain the safety and integrity of the samples.

Storage and Handling:

Store the AD-CHAMBERS in dry place. Handle with care to avoid scratching or damaging the exclusive surface.

Disposal:

Dispose of in accordance with local regulations. Stainless steel is recyclable, and we recommend recycling when possible.

For any further queries or technical assistance, please contact our customer service department.
